# 3. Release notes

Release	Description	Date released
18	Latest available Version	2015-06-09

## 4. Module description

**Module Name:** ArchiCAD64 [REDACTED] N

**Replaces (long term):** ArchiCAD64 [REDACTED]

**Contains applications:** ArchiCAD version 18

**Profiles in IMU:**

Client Profile: App ArchiCAD\_18

User Profile: App ArchiCAD

**Application Group Name:** A-Archicad

**Status:** In production

**Dependencies:** AdobeReader [REDACTED]  
JavaRuntime\_ [REDACTED]

**To be uninstalled first:** AdobeReader\_ [REDACTED]

**Please pay attention** that those two programs are not part of the client profile App ArchiCAD\_18.  
The reason for this: It gives more flexibility on any LCM for AdobeReader and Javaruntime.

**Available:** Archicad Users [REDACTED]

**Target Group:** Archicad Users [REDACTED]

**Aliases:** n/a

## 5. General information

Both versions of Archicad 15 and Archicad 18 need to be installed and available on co-workers computers for a certain time.

On some computers disk space is crucial. This must be verified whenever Archicad 18 needs to be installed.

After all projects have been migrated to Archicad version 18, the old version Archicad 15 should be de-installed.

██████████ will inform ITUS when it is time to remove Archicad 15.

## 6. Rollout information / guideline

1. Verify that users involved have enough disk space
2. Split users into groups – currently there are about 60 users running Archicad 15.
3. Remove AdobeReader ██████████
4. Remove old Javaruntime modules (for ex. Java\_Runtime ██████████)
5. Add client profile for AdobeReader ██████████
6. Add client for ArchiCAD64 ██████████ & ArchiCAD64\_Hotfix5100 ██████████ (App ArchiCAD ██████████) to relevant computers.
7. User profile for ArchiCAD ██████████ will be the same as for ArchiCAD\_ ██████████. so no change needs to be done here.
