

Clients

Preparation – (ready one week before migration)

- ☐ Make sure that all laptops are available on the migration day
- ☐ Find a procedure for how to migrate homepc's
- ☐ Make sure that all laptop users have saved their data on their home directory, make users aware that they are responsible for their data which is locally stored.
- ☐ Make sure that laptop users have used the backup utility for [REDACTED] filecabinet.
- ☐ [REDACTED].vbs: Script which copies Internet Explorer favorites to the users home directory and c:\windows\profiles\<default user>\Application data\ICAclient\PN.ini
- ☐ Script which is changing the registry entry onto the ICC 2.0 clients for referring to the "Rserver" variable in startup.vbs.
- ☐ List of which Terminal Server default printer is assigned to which user
- ☐ Make sure that you have downloaded the installation list for each user/client from ROLLE.
- ☐ Consider program links (Excel, Word, ...) might stop working after migration.

Client Migration:

Client migration can be started during the first [REDACTED] server is installed or during "nonworking hours".

- ☐ Run [REDACTED]
- ☐ Migrate the clients **see installation manual* [REDACTED]
[REDACTED]

Test the functionality of the Client

Handover a list to the user

- ☐ Logon to the workstation
- ☐ Check with user, if all applications he/she needs, are installed
- ☐ Check if user is able to print
- ☐ User's file cabinet
- ☐ User's data
- ☐ User's file shares
- ☐ User's favorites
- ☐ User's addressbook
- ☐ Access to intranet
- ☐ Check the connection to the Terminal Server
