Country	2 digits																																														
Department, Channel No	2-3 digits (optional - depends if it is a store, so... etc)																																														
-	a minus to be able to differ it easier																																														
Operating System (OS) etc.)	2-3 digits (optional - depends on the OS (for ex. Linux, VMS, etc.)																																														
Function	1																																														
Consecutive Number	2																																														
001-099	Fileserver/Printserver (FS/PS) + ALL																																														
100-199	Terminal Server (TS)																																														
200-299	Database Servers (DB)																																														
300-399	WEB Servers (WEB)																																														
400-499	Application Servers (APPL)																																														
500-599	Cluster																																														
600-699	Infrastructure (DNS, WINS,...)																																														
700-799	Free																																														
800-899	Unsupported Servers (Human Ressource, external companies,...)																																														
900-949	Development Server (DEV)																																														
950-999	Test Server																																														
NT/WTS	NT																																														
Linux	LNK																																														
Aix	AIX																																														
VMS	VMS																																														
OS400	OS4																																														
OS390	390																																														
Workstation Naming	<p>Although the Clients are not part of this project, we reviewed the Workstation Naming as well, due to the Server Naming changes.</p> <p>The Workstationname contains the following informations:</p> <table> <tr> <td>Country</td><td>2 digits</td></tr> <tr> <td>Department, Channel No</td><td>2-3 digits (depending on the Servername) a</td></tr> <tr> <td>-</td><td>minus to be able to differ it easier</td></tr> <tr> <td>Function</td><td>2 digits</td></tr> <tr> <td>Consecutive Number</td><td>3 digits</td></tr> </table> <p>Examples:</p> 	Country	2 digits	Department, Channel No	2-3 digits (depending on the Servername) a	-	minus to be able to differ it easier	Function	2 digits	Consecutive Number	3 digits																																				
Country	2 digits																																														
Department, Channel No	2-3 digits (depending on the Servername) a																																														
-	minus to be able to differ it easier																																														
Function	2 digits																																														
Consecutive Number	3 digits																																														
Domain Naming	<p>We skipped this point for the moment, because if we switch to W2K then there will be another Domain Concept anyhow.</p>																																														

Printer Naming	<p>The Printername contains the following informations:</p> <table> <tr> <td>Country</td><td>2 digits</td></tr> <tr> <td>Department, Channel No</td><td>2-3 digits</td></tr> <tr> <td>Location</td><td>5 digits</td></tr> <tr> <td>Number</td><td>2 digits</td></tr> <tr> <td>Type</td><td>1 digit</td></tr> </table> <p>Printertypes:</p> <table> <tr> <td>L</td><td>Laserprinter</td></tr> <tr> <td>C</td><td>Colorprinter</td></tr> <tr> <td>M</td><td>Matrixprinter</td></tr> </table> <p>Examples:</p> <div></div>	Country	2 digits	Department, Channel No	2-3 digits	Location	5 digits	Number	2 digits	Type	1 digit	L	Laserprinter	C	Colorprinter	M	Matrixprinter
Country	2 digits																
Department, Channel No	2-3 digits																
Location	5 digits																
Number	2 digits																
Type	1 digit																
L	Laserprinter																
C	Colorprinter																
M	Matrixprinter																
User Account Naming																	
User Account Properties	<p>We agreed on Minimum recommendations in the Account Domains which means:</p> <div></div>																
User directories	<div></div>																
Share User directory	MemoID\$																
Permission on all shares	<div></div>																
Permissions on System-, Data-, and Server-application Drive Directories (NTFS-Permissions)	<p>C:\ System Drive Ressource Domain\Administrators <div></div> Especially the c-drive needs to be reviewed so that we have proper rights on the every directory. <div></div> <div></div></p> <p>D:\ Serverap → Serverap: <div></div> → I386: <div></div> → Install: <div></div></p> <p>E:\ Data → Data <div></div> Users: User's Homedirectory: <div></div> <div></div></p> <p>→ Projects: <div></div></p> <p>→ Exchange: <div></div> → Iccprogram: Custom ICC rights → Iccsetup: Custom ICC rights</p> <p>The following new groups will be implemented to reduce the use of the Administrator Password:</p> <p>The new Accountnames contain the following informations:</p> <p>Servername - Function</p> <p>There will be 2 new groups defined:</p>																

	<p>[REDACTED]</p> <p>[REDACTED] Userdatamanagement (for people who needs to create Users and their homedirectories)</p> <p>[REDACTED] Helpdesk (for Serveradministration which is covered by the helpdesk)</p> <p>Definition:</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p>
Local Drive Letters	[REDACTED]
Local/Network Drive letters on Client side	[REDACTED]
Server Raid Configuration	<div style="display: flex; justify-content: space-around; align-items: flex-start;"> <div style="text-align: center;"> <p>Raid 1</p>  <p>9 GB 9 GB</p> </div> <div style="text-align: center;"> <p>Hotspare (optional)</p>  <p>9 GB</p> </div> <div style="text-align: center;"> <p>Raid 5/ Raid 1E</p>  <p>9 /18 9 /18 9 /18</p> </div> </div> <p>[REDACTED]</p>
Scheduled Automatic Reboot	[REDACTED]
TimeService	[REDACTED]
CleanUp Exchange Drive	[REDACTED]
Management Software	Yes
Configuring FTP	[REDACTED]
Backup Exec	[REDACTED]
MS Print Server Service	[REDACTED]

Remotely Possible	Will be [REDACTED] in future
NT-Service Packs	SPK 6a
Disable Print Notifications	[REDACTED]
